CUT FLOWERS

We sell Peonies, Iris, Gladiolus, Delphinium, etc., in season. We have all colors. Prices right. Orders of \$1.00 or over sent Postpaid anywhere in Utah.

VISITORS ARE WELCOME

Hundreds visit our Flower Gardens every year. You are not obligated in the least so please come. The glads will be in bloom from about the first of August until frost. We will have over 1,000 varieties in bloom this summer.

VICTORY SPECIAL

RED, WHITE AND BLUE COLLECTION—25 large bulbs, each a different variety, all colors, but unlabeled, included in separate bag 1 RED ADMIRAL, 1 MAMMOTH WHITE, 1 BLUE BEAUTY, Postpaid. \$1.00.

GLAD GARDEN MIXTURE—Best varieties for mass effect in the garden—100 for \$4.00. 250 for \$9.00.

If descriptions confuse you, come and see the fine colored pictures we have. They will make selection easy. Gladview Gardens is located one-half mile North of Pace's Sandwich Shop (Near the new highway 91 bridge over Provo River).

VISITORS WELCOME

READ CAREFULLY BEFORE ORDERING

The bulbs listed below are young, healthy and sure to bloom. Free cultural directions will be included with each order. All prices Prepaid anywhere in U. S.. Delivery will be made early in April unless otherwise specified in your order. All stock offered and orders accepted subject to prior sale, order early. Terms: Cash with order. No mail orders for less than \$1.00.

PRICES ARE FOR LARGE BULBS, no medium or small bulbs this year except as noted. Bulblet orders will be generously filled, however, no single item for less than 10c. As we have over 1000 varieties we probably have all your favorites even though they are not listed, so just send your order at current prices and we'll do our best.

EXTRAS—On orders of \$1.00 or more, we always add extra bulbs of newer varieties for trial. Look for them.

PICARDY, after ten years at the top, is finally giving ground to a few other varieties that are equally as good or better when well grown. Some of these are—ALADDIN, ALGONQUIN, CORONA, MARGARET BEATON, MYRNA, PEGGY LOU, and others. When stocks of these are more widely distributed, their winnings will be much greater. It should be understood that winnings of the newer varieties are small because their newness and higher price has prevented their being grown and entered in very many shows. A safe rule to follow is:—any variety costing over 25c that is able to win 5 awards or over is as good or better than cheaper varieties winning many prizes.

We are probably the only growers who make a definite effort to list all top winners, so if you want the best let the stars * * * guide you. Any variety that can win firsts and championships in shows all over the continent is bound to be good in your own garden.

Using the N.E.G.S. and other reliable reports of over 50 major shows held in 1943 and 1944 and tabulating only firsts, we find that over 200 varieties were able to win 5 or more awards.

* Indicates this variety won over 5 awards.

** Indicates this variety won over 15 awards.

*** Every one of the 36 varieties that won 25 or more awards in 1943-44 are indicated by***. Figures in parentheses (33) indicates the number of awards won.

This year we are including the National Classification Committee type and color class number, it follows the color description, and is used and recognized by most Gladiolus Societies in the U. S. and Canada. In the shows varieties compete by these color and size classes. The letter "F" stands for "Formal" and indicates that the florets are arrayed in a double row up the stem in a close arrangement. "I" is for "Informal" and means that the florets of this variety have alternate and open spacing, giving a more graceful and artistic effect. The Formal is about the same as the old "Exhibition" type and the Informal is similar to the "Decorative" type. Under the new classification, the 100 series indicates the tiny miniatures with florets under 2½ inches in diameter. The 200 class is for small glads with florets 2½ to 3¼ inches in diameter. The 300 class is for medium glads with florets of 3¼ to 4¼ inches. The 400 class is for large glads with florets of 4¼ to 5½ inches and the 500 class is for giant glads with florets over 5½ inches in diameter. The last two figures of the number indicate the color group to which the variety belongs. Those ending in even numbers have pure self colors and those ending in odd numbers are marked or blotched with a deeper shade.

00 - 09	Pure white to cream.
10 - 19	Yellow to deep buff.
20 - 29	Light to deep orange.
30 - 35	Light to deep salmon.
36 - 39	Shades of scarlet.
40 - 49	Light to deep pink.
50 - 59	Pure red to black red.
60 - 65	Light to deep rose.
66 - 69	Lavender shades.
70 - 79	Purple and violet.
80 - 89	Smoky shades.
90 - 99	Any other color: greys, browns, greens, etc.

* ZUNI (15)—New giant smoky purple		F-480	1 for .10	.80	

SMALL FLOWERED GLADIOLUS THAT WIN PRIZES

These varieties naturally produce florets of three alone or with other flowers is unsurpassed. Other advantages are: more spikes per bulb, more bulbs per dollar, earlier blooms and less care as the wind never tips them over. The bulbs are smaller in most cases than the large flowered varieties.

The first of these is the fact that the United States has a large and growing population of people who are of Mexican descent. This population is concentrated in the southwestern United States, particularly in California, Arizona, and New Mexico. It is estimated that there are over 10 million people of Mexican descent in the United States, and this number is expected to increase significantly in the future.
